### **Megawatt**

Transforming sustainable energy education

Megawatt brings energy to life with engaging interactive games and workshops. Megawatt has been developed to raise energy literacy and attract talent to the energy sector.

Offered to local schools including :-

Rockbeare Primary

West Hill Primary

Cranbrook Education Campus

**Grants will be available for both capital and revenue projects and can be used on the following:**

- Community buildings and facilities. For example: capital improvement works to village halls, community centres, museums, heritage centres and community cafes.
- Energy conservation and renewable energy. For example: Insulation and energy efficiency improvements in community buildings, solar panel projects.
- Community activities and services. For example: projects addressing health and wellbeing, volunteering, social isolation, family poverty, community safety, access to amenities, young and older people's projects, and projects providing support for local clubs and groups.
- Environmental and public open space projects. For example: projects involving parks, nature reserves, community growing schemes, and habitat/species conservation.
- Sports, recreation, and play. For example: playgrounds, skate parks, sports equipment, and sports field drainage projects.
- Educational grants. For example: targeted STEM educational activities, outdoor classrooms, Forest School development, educational trips.

## Megawatt to deliver STEM activities close to the Ford Oaks Project

### Transforming sustainable energy education

Megawatt brings energy to life with engaging interactive games and workshops. Megawatt has been developed to raise energy literacy and attract talent to the energy sector.

### What is Megawatt?

- Megawatt combines an award-winning card game, a rich library of custom resources, and expert workshop facilitators to deliver engaging learning experiences about energy.
- An award-winning card game
- Race togg build the world's most resilient energy grid with Megawatt! Balance power generation and environmental impact while navigating challenges like environmental and political events.
- A library of teaching resources
- A collection of lesson plans, posters, presentations and worksheets designed for both primary and secondary schools. Curriculum-aligned, project-based learning activities accredited by the Association for Science Education
- This package ensures ongoing engagement with pupils to imbed the importance of renewable energy. The ability for the school to retain the materials and re use them provides a greater impact on the students understanding of renewable energy.
